

Terminal Units

SPECIFICATION SHEET

MEC Terminal Units are designed and built in the UK to the highest standards with integral non-interchangeability.

MEC Medical Ltd Terminal Units are designed to fully comply with the requirements of European Standards BS EN ISO 9170-1 – 2008. MEC Terminal Units can be either surface flush or trunking mounted. Features integral to the units include non-interchangeability between probes, socket assemblies and terminal blocks.

Quick release of the probe with single handed operation. Incorporates a secondary valve, which facilitates ease of maintenance without interruption of the gas supply to the unit.
