

High Vacuum Suction Controllers

SPECIFICATION SHEET

MEC High Suction Controllers are designed and built to the highest standards for any application where high vacuum is required.

High vacuum is suitable for use in operating theatres, intensive care units, trauma and casualty units, wards and any application where high vacuum is required. The suction controller enables the vacuum to be set at any level from 0 to full pipeline vacuum. The vacuum gauge is marked from 0 to -100 kPa and 0 to -750 mmHg.

Features

- Controllers are supplied with BS probes
- Alternative probe types are available, including DIN and ULA probes
- Vacuum controllers are supplied with a gauge (marked in kPa and mmHg)
- Units with remote probes are supplied with 2 metres of vacuum hose
- Disposable hydrophobic filter that acts as a safety overflow valve
- Vacuum adjustment knob
- On/Off switch.

Suction Controller
on direct BS Probe

Specification

Weight	0.5 Kg
Height	16cm
Depth	16cm
Width	8cm
Range	0 to -100kPa 0 to -750mmHg
Filter	Disposable hydrophobic filter with colour change

Supplied by
